Re: Reduced Sampling Requirements

Dear Mr. Hartog:

Upon review of your 1999 nutrient analyses, the State of Florida has determined your deficient/excessive rate to be (0.00%).

Your calendar year 2000 sampling frequency for nutrients/protein, fat and fiber is one per every 2000 cumulative tons for all types of feeds distributed (minimum one protein, fat and fiber sample).

If you have any questions about this program, please contact Jack Bulloch at (850) 921-5603 or Van Madden at (850) 487-3863.

Thank you for your cooperation.

Sincerely,

BOB CRAWFORD

April 13, 2004

Dear Sir or Madam:

This is a notification of the requirements of the Florida Commercial Feed Law and Rules, Chapter 580, Florida Statutes, and Chapter 5E-3, Florida Administrative Code.

Each distributor of commercial feed in the state of Florida shall submit samples of their feed for testing to a laboratory certified by the Department of Agriculture. Those registrants required to submit samples for nutrient analysis do so at a frequency determined by the previous year's deficiency rate.

Upon reviewing the analytical results of samples your company submitted for nutrient analyses in 2003, it has been established that your deficiency rate for 2003 was 0%.

Based upon your deficiency rate (0%), your sampling frequency (protein, fat, and fiber), for calendar year 2004 shall be one sample per every 2000 cumulative tons for all types of feeds distributed (minimum one nutrient sample).

If you have any questions about this program, please contact me at (850) 488-9095.

Thank you for your cooperation.

Sincerely,

**CHARLES H. BRONSON**

January 24, 2008

Dear Sir or Madam:

This is a notification of the requirements of the Florida Commercial Feed Law and Rules, Chapter 580, Florida Statutes, and Chapter 5E-3, Florida Administrative Code.

Distributors of commercial feed in the state of Florida shall submit samples of their feed for testing to a laboratory certified by the Florida Department of Agriculture and Consumer Services. Those registrants required to submit samples for nutrient analysis do so at a frequency determined by the previous year's deficiency rate.

Upon reviewing the analytical results of samples your company submitted for nutrient analyses from January, 2006 through June, 2007, it has been established that your deficiency rate for this period was 0%. The eighteen month sampling period was due to the shift in the sampling year which now runs from July to June instead of January to December.

Based upon this deficiency rate, your sampling frequency (protein, fat, and fiber) for the current sampling period (July 2007 through June 2008) shall be one sample per every 2000 cumulative tons for all types of feeds distributed (minimum one nutrient sample).

If you have any questions about this program, please contact me at (850) 414-1890

Sincerely,

**CHARLES H. BRONSON**

December 16, 2010

Dear Sir or Madam:

This is a notification of the requirements of the Florida Commercial Feed Law and Rules, Chapter 580, Florida Statutes, and Chapter 5E-3, Florida Administrative Code.

Distributors of commercial feed in the state of Florida are required to submit samples of their feed for testing to a laboratory certified by the Florida Department of Agriculture and Consumer Services.

Upon reviewing the analytical results of samples your company submitted for nutrient analyses from July 1, 2009 through June 30, 2010, it has been established that your deficiency rate for this period was 0%. This deficiency rate determines the sampling frequency rate required for your company for the current sampling period.

Based upon this deficiency rate, your nutrient sampling frequency (protein, fat, and fiber), for the current sampling period (July 1, 2010 through June 30, 2011) shall be one sample per every 2000 cumulative tons for all types of feeds distributed (minimum one nutrient sample).

If you have any questions about this program, please contact me at (850) 617-7841.

Sincerely,
